

NUTRIENT MANAGEMENT (CSP Enhancements)

April 2005

Enhancement Activity Task Sheet

WV-CSPENM-TS

Clients Name:

Worksheet 2- Wetland Restoration

Payment = \$2.00/Acre/yr of contract watershed acres that surface water drains into the wetland or wetlands. Surface runoff from cropland or pasture is routed through newly constructed or restored wetland. Wetlands will be protected from grazing by livestock during the nesting season (March 15-July 15). Vegetation should be cut and removed in September to October 15 to remove built up levels of nutrients. Sediment will be removed to maintain wetland capacity.

Use this (or similar) table to document location and incorporation method used.

Tract & Field #s or Names	Watershed Acres	Wetland Acres	Wetland Restoration/Construction Date

Wetland Restoration Certification

I certify that I have established a wetland in the field(s) listed in the table and I am maintaining the wetland function.
